

I am writing today to discuss the benefits that I have received from my ability to listen to XM Satellite Radio and its traffic and weather channels. As an individual who travels an hour each way to work, this service has been helpful for travel updates and enjoyable on my long commute. XM Radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to listen to. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I currently have available.
